

KITCHEN ISLAND WITH COOK TOP AND SEATING AREA

With room for a couple of stools this design incorporates both a seating and cooking area with extra storage. Just another example of how creative you can get with your kitchen island. In the picture they show a decorative toe kick, which can be made, but we made it a regular toe kick to make it easy.

Supplies You Will Need from the RTA Cabinet Store

- ✓ One 36" sink base (for the cooktop- if you are using a full range, you will not need this cabinet)
- ✓ One 21" wide base cabinet
- ✓ One 21" wide three drawer base cabinet
- ✓ Two 21" wide x 30" high wall cabinets
- ✓ Three 3' x 4' island panels
- ✓ Three 8' pieces of toe kick
- ✓ 2 x 4's from your local supply store

Instructions to Build a Kitchen Island with Cook Top and Seating Area

- Step 1: Install the sink base cabinet in the middle and the two other base cabinets on each side. Make sure to secure them at the face frames and secure them to the floor.
- Step 2: Using the 2x4's, create two platforms that are 20 3/4" wide x 11 3/8" deep x 4.5" high. These will be secured directly to the back of the end cabinets, lining them up with the back edge of the cabinets.
- Step 3: Take the two wall cabinets and secure them to the back of the corresponding base cabinets, as well as securing them to the platforms.
- Step 4: Using one of the island panels, cut it to fit between the two wall cabinets, and to cover up the back of the sink base cabinet.
- Step 5: Using the two remaining island panels, cut them to size, to cover up the end cabinets and cover up the seam where they meet.
- Step 6: Using the toe kick, cut to length to cover up the bottom of the cabinets and the framing. Make mitered cuts on the edges, to create the finished look.
